• Sometimes called the “DARS” audit.

• Individualized report that lists how completed courses and exams apply towards satisfaction of all University, College (including general education), and major requirements.

• Includes all UCSB, UC, Extension, and EAP courses and all accepted transfer courses.

• Reports are run in real-time.

• Degree audits specific to student’s declared catalog year.

• The degree audit is NOT the student’s official record!

• Currently undergraduate students only.
Terms we use:

“DARS” or “DARS audit” (degree audit)

DARwin (software interface used for Registrar and Admissions staff; used to create degree audits and process exceptions)
Before releasing a major to students, files for all current students in the major were pulled and all paper petitions were data entered by Registrar’s Office staff.

Went live with degree audits to undergraduate students in August 2007 with 11 major audits and five progress checks.

After release to students, all newly received petitions for degree requirements were manually entered by Registrar staff.
History

• As more major audits were released, this data entry workload increased for Registrar staff

• Quickly became apparent that the workload needed to be distributed

• Led to formation of an Exceptions workgroup and eventually development of a workflow to replace the existing process

• 54 major audits and seven progress checks live to students when Degree Audit Exception Workflow released in March 2009

• Currently 139 major audits and seven progress checks live to undergraduate students
Goals of the Exception Workflow

• Replace paper petition approval process with an online resource.
• Make the process by which petitions are created as user friendly as possible by mimicking the existing process.
• Increase the speed of petition processing from the point of initiation through data entry into DARwin.
• Maximize the number of petitions that could be automatically entered into DARwin in the fewest number of petition types to help reduce the amount of training required.
• Minimize of petitions that would require manual intervention by the Academic Services staff in the Office of the Registrar.
Need help?

• Don’t know what petition type to use?
  • Email darshelp@sa.ucsb.edu!

• Think a petition didn’t go through properly?
  • Email darshelp@sa.ucsb.edu!

• See an error in the audit?
  • Email darshelp@sa.ucsb.edu!
Permissions and Roles
Workflow Permissions

• We identified four “roles” in the existing process:
  • Department advisor
  • Department chair
  • College advisor
  • Registrar staff

• Each user is assigned a Role and Department (up to 4) or College affiliations

• Permissions are coded as part of the SIS permissions and are passed to AAA at login.
### Roles

<table>
<thead>
<tr>
<th></th>
<th>Initiation</th>

</tbody>
</table>

1. Initiation by the Dept. Chair also functions as Dept. Recommendation.
2. Initiation by the College also functions as a College Decision.
3. Each role has different restrictions as to which petitions may be viewed in the Queue.

The Withdrawal option is available to the College role up until the petition enters a College Approved or College Denied status.
The Department Advisor role is intended for departments where a staff person would need to be able to enter a petition, but someone else would be responsible for recommending approval of the request.

This role will only allow for the creation of petitions associated with major requirements or courses within the role’s department.
This role is intended for the individual in the department that is responsible for recommending approval/denial of the petition for the department. This may be the actual Chair of the department or a faculty or staff designate.

The person with this role may initiate and render a decision on their own petitions, and they may access the department My Work Queue to render a recommendation for petitions that had been previously initiated by a Department Advisor role and are in an “Awaiting Dept Chair Review” Status.
This role is intended for advisors within the colleges. Accounts with this role may initiate and approve petitions for General Education or University requirements.

They may also access a work queue to view, evaluate and approve or deny petitions approved by a department.

Major petitions are assigned to an advisor with a College role based on rules provided by the college.

Users in a college role have additional capabilities to assign petitions to other advisors in a College role.

Upon approval by this role, most petitions will feed directly into DARwin. Those that can not be entered automatically are placed in an “Awaiting Registrar Processing” status.
This role is assigned to Academic Services staff in the Office of the Registrar. Petitions that cannot be fed directly into DARwin are placed in an “Awaiting Registrar Processing” status.

Only ‘Other’ petitions and ‘Course Equivalency’ petitions with the Credit Adjustment Needed box checked are reviewed by someone in a Registrar role. All other petitions are fed into DARwin after College Approval with no further review.

This role may only process the petition; they may not change the approval status or withdraw the petition.
Petition Types
Select a Petition

What kind of exception would you like to enter?

Add Course(s) to an Area

Only the student’s major department or college may initiate this type of petition.
Apply a course(s) to a particular area within a major, or university or GE requirement.

Substitute Course(s) within an Area

Only the student’s major department may initiate this type of petition.
Substitutes a course(s) for another within an area of a major. These courses are not considered equivalent but are acceptable for substitution.

Universal Equivalency

Only a course’s home department may initiate this type of petition.
Sets one transfer course as directly equivalent to a UCSB course. This is similar to a course to course articulation, but applies only for this student. UC transfer courses will follow the UCSB repeat policy.

Advisor Approval

Generally used by departments which require approval of major electives.

Other

Petitions for graduation requirements which cannot be handled through a petition type above.
Overview of Petition Types

• Add Course(s) to an Area
• Substitute a Course within an Area
• Universal Equivalency
• Advisor Approval
• Other
The Add Courses petition type is intended to be used to add courses from a student’s record to a requirement. This petition type is good for situations in which a course is being used to fulfill a requirement, but is not intended to replace any particular UCSB course that is already approved to count towards the requirement. This may be the only option for petitioning elective requirements where a student is allowed to choose one or more courses from a large set of options.
What this petition type does:

• The courses specified from the student record in the ‘Select Courses’ field are added to the list of courses which may apply to the requirement selected in the ‘Requirement’ field.
Add Course(s) to an Area

What this petition doesn’t do:

• It cannot change the number of courses applied.
  • If you want to use 2 courses from the student record to satisfy 3 required courses, this petition cannot make that kind of adjustment. (See ‘Substitute a Course’)

• It cannot alter the unit value of the course being added (Use Other type).
  • If a transfer course was granted 6 units and you only want 4 units to apply to the requirement, this petition cannot handle the request

• It cannot apply a course to multiple areas/split a course between sub-requirements (Use Other type).

• It cannot override a unit or course limitation.
  • A limitation that only 4 units of 199 coursework apply to the major requirements or a limitation that only 8 units from a particular supercourse apply to the major requirements.

• It cannot override the rejection of a course by a requirement.
  • The Spanish major requirements specifically exclude SPAN 195 and 196 from applying to area E of the upper division. This course rejection is coded into DARS and can only be overridden by an Other petition.
Additional notes:

• This petition type is never viewed by anyone in Graduation Matters and is fed into DARwin exactly as entered.

• This petition does not ‘force’ the course selected to apply to the requirement specified. It simply informs DARwin that it may use the course(s) towards the requirement area. If the course may also be used to satisfy a different requirement area, DARwin will apply the course to the first requirement it encounters that needs it.

• Check the ‘Accept P/NP’ box if the course was taken with P/NP grading.
Substitute a Course within an Area

The Substitute Courses petition type is intended for situations in which you would like to apply courses from the student record as substitutes for specific courses in the degree requirements.

This petition type is able to adjust for differences between the number of courses being applied from the student’s record and the number of courses to be satisfied in the degree requirements. It also ensures that a particular course not be counted twice if a petition is filed and the student subsequently completes the substituted UCSB course.
Substitute a Course within an Area

What this petition type does:

• The courses specified from the student record and the courses from the degree requirement are noted in DARwin.

• If the number of courses applied from the student record is not equal to the number of courses being substituted in the requirement, the exception adjusts the number of courses required by the requirement to compensate for the difference.
Substitute a Course within an Area

What this petition type does not do:

• It cannot split courses between different sub-requirements.
• It cannot apply partial units from a course toward the requirement.
• It cannot be used for prerequisite checking.
Substitute a Course within an Area

Additional Notes:

• This petition type is never viewed by anyone in Academic Services and is fed into DARwin exactly as entered.

• This petition does not ‘force’ the course(s) selected to apply to the requirement specified. It simply informs DARwin that it may use the course(s) towards the requirement area. If the course may also be used for a different requirement area,

• DARwin will apply the course to the first requirement it encounters that needs it.

• If an adjustment to the number of required courses is included on the exception in DARwin, it is applied even if one or more courses on the exception were applied to a different requirement.

• Check the ‘Accept P/NP’ box if the course was taken with P/NP grading.
Degree Audit - Substitute Course(s) within an Area

Program or GE Area: Enviromental Studies (BA)
Catalog Year: 2010
Requirement: (BA) One GEOL or GEOG course from the specified list. (2004-)

Select Courses:
- EARTH 1
- EARTH 2
- EARTH 4
- EARTH 4W
- EARTH 20
- GEOG 3A
- GEOG 3B

Substitute For:
- EARTH 1
- EARTH 2
- EARTH 4
- EARTH 4W
- EARTH 20
- GEOG 3A
- GEOG 3B

Justification:

--- Select a Previous Justification ---
General Principles
Add and Substitute Petitions

• You can petition a work-in-progress course (student is registered but hasn’t received a final grade yet).

• If a student earned units in a course but subsequently repeated the course for a better grade (got a D+ the first time, B- the second time), if you need to petition the course, you will be selecting the first attempt of the course (D+ grade).
  • The first attempt is used to fulfill requirements but the second attempt will be counted in the GPA.

• Cross-listed courses (MCA) do not need to be petitioned (they count automatically).
Universal Equivalency

This is the only petition type related to the courses offered by the department, not to major requirements. The Universal Equivalency petition allows a department to identify transfer courses as being direct equivalents to one of their department’s courses. This can only be done for a 1 to 1 equivalence where one transfer course is equivalent to one UCSB course. This exception is student specific and does not affect any other students that may have taken the same course.

These petitions are also used during pre-requisite checking when students are registering for courses. This means that a ‘Y Screen’ entry does not need to be made in STAR for courses that have a Universal Equivalency petition.
What this petition does:

• This exception forces the DARS system to treat the course on the student’s record as if it were the specified UCSB course. This course is then automatically applied to any requirement that would accept the UCSB course, regardless of major or college.
Universal Equivalency

What this petition type does not do:

• It cannot accept any combinations of courses other than a 1 to 1 equivalent. The DARS articulation process run by Admissions can articulate courses in other combinations, but this petition cannot.

• It will not override any requirements that are specifically encoded to exclude transferred equivalents of UCSB courses (e.g. the Special Subject Area Writing requirement).
Additional Notes:

• This petition type is only reviewed by Graduation Matters when the ‘Credit Adjustment Needed’ box is checked.
  • A credit adjustment may be needed if the course equivalent would create a situation where duplication or partial duplication of course credit would exist on the student’s record.
  • An example would be if the Psychology department were verifying that a pre-matriculation transfer course was equivalent to PSY 5, but the student had subsequently taken PSTAT 5A at UCSB. If the petition were put through and nothing was done about the PSTAT 5A credit, it would result in a situation where SREG/STAR would retain units for both courses (it doesn’t know about these petitions), but any Degree Audits would remove credit for the PSTAT 5A course.

• One drawback is that DARS ceases to recognize the course by its original name and any other petitions (e.g. GE exceptions entered by Admissions) entered for this course may need to be adjusted.
Advisor Approval

This petition type is usually used in situations where satisfaction of a requirement is not related to a specific course on the student’s record. This is primarily used by the colleges for requirements like Academic Residency or waiver of the American History & Institutions requirement. Some academic departments might use this petition if their major audits include a requirement that could be satisfied based on verification from the advisor (e.g. department approval of major electives, etc.).
What this petition does:

- This petition either adds information to the student’s record to help the audit determine which version of a requirement to enforce or it adds a ‘course’ which satisfies the requirement.
Advisor Approval Types

• EALCS
  • Chinese and Japanese: switch students between “tracks”

• Global Studies
  • Level 3 foreign language satisfied by high school work
  • Native speaker (foreign language)

• Italian Studies
  • ITAL 20X or 26 satisfied via EAP program

• Linguistics
  • Level 3 foreign language satisfied by high school work
  • Native speaker (foreign language)
Advisor Approval Types

- Engineering majors
  - Advisor approval of electives
  - Using a minor for the Depth requirement
- Creative Studies majors
  - Approval of GE and major requirements
- University requirements
  - American History & Institutions: non-immigrant visa waiver
  - Allow a senior who attended UCEAP to follow normal residence requirement (35/45)
  - Note that a senior who attended UCEAP does not need to return to complete 12.0 units at UCSB
This petition type is intended for anything that is not covered by the previous types and would require that an exception be manually added to DARwin by the degree analysts in the Office of the Registrar.
When to use this petition:

• If a course needs to be split to apply to more than one sub-requirement.
• If only a portion of the units awarded for a course may be applied to the requirement.
• If the request is to override a limitation on the number of units of a particular course or super-course that may be applied to the major.
• If a course that had been rejected (excluded) from a particular requirement, but needs to be applied in this one case.
• A request to change a major catalog year for a current major.
• Subject credit only.
• IGETC.
• Want to petition course but student earned an “F” grade.
• Any other request that is particular to a student’s requirements but isn’t covered by one of the other petition types.
Don’t use this petition for:

• Anything that can be covered by Add Course, Substitute Course, Universal Equivalency, or Advisor Approval petitions.

• Petitions that are not degree requirement petitions.
  • Concurrent enrollment
  • Major change
  • Repeats (unless the course is already on the student’s record-can use Universal Equivalency)
Any petitions which don’t fit into one of the four standard types can be entered here.

</tbody>
</table>

Similar restrictions: “…contingent on you fulfilling all graduation requirements by the end of Spring 2016.”

This type of request cannot be enforced by the Office of the Registrar!
Why does it do that?
It switched requirements on me!

When I submitted the petition, I chose:

Program: Comparative Literature
Catalog year: 2010
Requirement: **B. 3 UD literature courses (language other than English) [1 required]**
Select Courses: FR 101

Now that the College has approved, when I view the petition in AAA, it says:
Program: Comparative Literature
Catalog year: 
Requirement: **D. One UD literature course taught in a foreign language**
Select Courses: FR 101

What happened?
What happened?

• In the degree audit programming, each requirement has a “code” associated with it (called the pseudocourse).

• Within a major, pseudocourses may be reused across catalog years, even if the order or number of required courses changes (was B, now D; was 3 courses, now 1).

• The catalog year and text of the requirement are not retained by the petition—only the pseudocourse is retained.

• When the petition is accessed any time after initial submission, it checks the table for the first instance of that pseudocourse and displays that requirement text.

• Solution: we’re working on a fix, but no adjustments are needed to the petition; it will work properly.
It added 2 courses when I petitioned only 1!

When I submitted the petition, I chose:

Program: Statistical Science
Catalog year: 2015
Requirement: D) 8.0 units of PSTAT electives
Select Courses: PSTAT 199, 4.0 units, W16

Now that the College has approved, when I run a degree audit, it displays this in the elective area:

W16  PSTAT 199  4.0
S16  PSTAT 199  3.0
F16  PSTAT 199  2.0

What happened?
What happened?

• While you selected only one quarter of a course in the petition entry, the quarter of the course is not retained by the system.

• The audit will pick up all courses with the same number.

• Solution: we’re working on a fix; in the meantime, email darshelp@sa.ucsb.edu to adjust.
I can’t submit a petition!

When I click submit, I get this error message:

"Unfortunately, the petition could not be saved at this time. Please try again later."

What happened?
What happened?

- We’re still investigating this issue.
- If you experience it, please email darshelp@sa.ucsb.edu with the perm number of the student and the date and time you were attempting to submit the petition.

This drop down menu allows the user to select the Program (i.e. major) or GE area that the petition will affect. Options available to the user are determined by the Department(s) or College associated with the user’s Role for the workflow.
This value is automatically populated based on the Program selected. If the program is already on the student record, the catalog year will populate with the major catalog year on the student’s record. If the program is not currently on the student record, it will populate with the current catalog year. The user may manually change this value to override the default.

Note: The Catalog Year does not actually affect the exception that is entered into DARwin. All it does is vary which options will appear in the Requirements drop down and which courses will appear in the Substitute For field.
This drop-down field displays the Requirement options available for the selected Program or GE Area for the selected Catalog year. Only requirements that may be petitioned using the petition type selected will be displayed.
Select Courses

Used on the Add Courses and Substitute Courses petitions, this field displays courses from the student record. This includes completed courses, courses in progress for the current quarter, and any future quarter courses for which a student is registered. Courses are sorted by institution (with UCSB courses listed first), with each institution’s courses listed chronologically.

In addition, the list of courses may be filtered by entering text in the ‘Filter’ field. The filter will filter using any text in the Select Courses field including the department codes, course name or course number.

Petitions may be processed for current or future quarter courses. Once approved, the petitions may be verified using a WIP audit. If the student does not pass the course or drops the course, the petitioned course will not satisfy the requirement.

Multiple courses may be selected by holding down the ‘CTRL’ key (Command key in OS X) as you click on the courses.

Note: When transitioning to a new quarter, the system quarter will sometimes roll forward before all grades have been submitted for the previous quarter. At the point the system quarter rolls forward, any classes that do not have grades assigned will disappear from the list. They will return once the course has a grade assigned.

Used on the Universal Equivalency petition. Indicate the UCSB course that the Student’s Course selection is equivalent to. All courses from that department’s Master Course Approval list will appear.
Student’s Course

Drop down menu listing courses from the student’s record. Only one course may be selected. Courses are listed by institution, with UCSB courses appearing first on the list.

Each institution’s courses are listed chronologically.
Request

Used to specify the student request on the Other petition type.
The justification field is intended for the student’s justification for the request (i.e. why do they think the request should be approved.)

The drop down field associated with the Justification text box contains the 10 most recent Justifications entered by the user for the current petition type. Selecting one of these options will automatically populate the Justification text box with the selected value which may then be edited, if needed.
Notify Student

If checked, when the petition is approved or denied by the college, a notification is sent to the student. This box is checked by default.
Accept P/NP

When checked, this text box will allow a course taken for a P/NP grade to be applied to a requirement that would normally only accept a letter graded course. This can be used for UCSB or transferred courses.
Used on the Universal Equivalency petition to indicate that an
adjustment needs to be made to the student’s UCSB record prior to
the petition being processed. This will redirect the petition into the
Registrar’s Queue after approval by the College.

An example would be if the Psychology department were verifying that
a pre-matriculation transfer course was equivalent to PSY 5, but the
student had subsequently taken PSTAT 5A at UCSB. If the petition were
put through and nothing was done about the PSTAT 5A credit, it would
result in a situation where SREG/STAR would retain units for both
courses (it doesn’t know about these petitions), but any Degree Audits
would remove credit for the PSTAT 5A course.

Make sure to specify the adjustment in the ‘Internal Comments’ field.
This is a message that will be included in the notification email to the student. Please note that students do not have any other mechanism for viewing petitions. If the Notify Student box is unchecked, any Messages to Student that are entered will not be sent to the student.
This text field is intended for messages intended for anyone who might view this petition in the future. This field is not included in the email notification to the student.

Note: While this field is not included in any notifications to the student, it is part of the student’s record and must be disclosed should the student ever request to see their complete record.
User Notifications

Email
Notifications are sent to students for any petitions that have the ‘Notify Student’ box checked. Notifications are sent after a final decision has been rendered by the college. For petitions that require Registrar Processing, the notification emails are not sent until processing by the Registrar’s Office is completed.

An email notification is only sent the first time a petition is approved or denied. If subsequent notes are added to petition, they will not be forwarded to the student. In addition, students do not have any way to directly access the workflow, so any notes added to petition after a college decision should be conveyed to the student using another mechanism.

Notifications to the student include all of the information entered on the petition with the exception of the ‘Internal Comments’ field. Please remember that the contents of this field will be provided to the student should they ever request to view their entire student record.
Hello LPCUOTU CWHCPCOT,

The petition mentioned below has been approved by the College. If you have questions, please contact your college office.

The petition mentioned below has been approved by the College. This information should be reflected in the student’s Progress Check and/or Degree Audit shortly. Please allow extra time for processing of “Other” petitions. For more information, please see the petition.

PLEASE NOTE: This course substitution petition is valid only for the major and requirement shown below. If the student switches majors, the substitution will not carry over to the new major automatically, and will require that a new petition be initiated.

Please save this email for your records.

Name: LPCUOTU CWHCPCOT
Perm Number: 000000
Petition ID: 15109
Petition Type: Substitute Courses
Date Submitted: 08/22/2012 14:55 PM
Petition for Major: Chemistry
Department: CHEM

Course:
REEDLEY: Spring 2010 - PHYS 4A/PHYS 1 - Physics for Scientists and En [C, 6.00]

Applied to GE/Area: Chemistry: Physics 6A-AL-B-CL

Substitute For:
PHYS 6A
PHYS 6AL

Justification:
Physics coursework completed at Reedley College approved by Physics department as acceptable for substitution for UCSB Physics 6A and 6AL.

This email was automatically generated by the Degree Audit petition processing system.

Please do not reply to this email.
Notifications are sent to Department Chair/Department Advisor roles when the petition enters a College Approved or College Denied status. Similar to the student notification, staff are not notified if any changes are made to the petition after the initial decision.

College Advisors do not receive any notification. This includes situations where a petition is placed in an ‘Awaiting Registrar Processing’ status prior to entering College Approved or College Denied.
Petition Statuses
This status is assigned after a ‘Dept Advisor’ role has submitted a petition. Petitions in this status are visible in the My Work Queue for any users with a ‘Dept Chair’ role in the department that initiated the request.
Awaiting College Review

This status is assigned after a user with a ‘Dept Chair’ role has recommended approval of a petition. The petition is placed in an ‘Awaiting College Review’ status and a reviewer with a role of ‘College’ is assigned based on rules provided by the colleges.
This status is assigned under one of the following conditions:

- One of these petition types in ‘Awaiting College Review’ is approved by someone in a College Role
  - All ‘Other’ petitions
  - Any ‘Universal Equivalency’ petition with the Credit Adjustment Needed box checked
  - Any petition for a student with a Degree Status of P, D, or F

- One of these petition types in a ‘College Approved’ status is subsequently denied by someone in a College role or withdrawn by someone in a department role.

Petitions in this status appear in the My Work Queue for staff with a Registrar role. After someone in a Registrar role processes the petition, the petition moves into the status that prompted the Registrar processing.
Assigned to petitions approved by a user in a College role. It may be applied to petitions in an Awaiting College Review or College Denied status.
Assigned to petitions denied by a user in a College role. It may be applied to petitions in an Awaiting College Review or College Denied status.
A user with a Department role may withdraw one of their petitions at any point in the process. A user with a College role may withdraw a petition while it is in an Awaiting College Review status.
My Work Queue

Users with Dept. Chair, College or Registrar’s may access to view petitions that are awaiting approval
The screen will default to showing a particular subset of petitions based on the user’s permissions.

- Dept. Chair: Shows petitions in ‘Awaiting Dept Chair Review’ that were submitted for a major from the user’s department.

- College: Shows petitions ‘Awaiting College Review’ that were Assigned to the user. After approval by the Dept Chair, petitions are assigned to a specific advisor based on the student’s major.

- Registrar: Displays petitions in ‘waiting Registrar Processing’. Clicking on any one of the petitions will open the petition for display to the user.
### My Work Queue - Degree Audit

To initiate a new petition for a student please use the "Initiate New Petition" option under the menu entry Students > Audits > Initiate New Petition.
