

Integrated Course Waitlist

May 14, 2014
Anthony Schmid
Associate Registrar, Systems

Today's Agenda

- Overview of Waitlist features
- Waitlist setup (eGrades)
- GOLD functionality
- Waitlist view and export
- Questions?

Waitlist Features

Waitlist will activate in GOLD once the following 3 requirements are met:

1. The department or instructor must have enabled the waitlist in eGrades
2. It must be after the start of Pass 2
3. All offerings of the course must be full
 - a. Ignores Print Suppressed courses
 - b. Closed courses are treated as Full

Waitlist Features

Once active a waitlist button will appear next to the Primary

When the student registers for the waitlist they will specify:

- Sections that they are willing to add
- Grading option, units, repeat value
 - Anything that would be required to actually add them to the course.

Waitlist Features

Courses added to the waitlist will count toward a student's maximum units for a pass.

- This should encourage students to be more active in waitlist management
- Each course is only counted once.
 - e.g. if the student selects 8 discussion sections for MATH 3A spread over 3 lectures, it only counts as 4 units.

Waitlist Features

Spaces that become available after a waitlist is active may not be added without approval code.

- When adding a course, if system finds a waitlist with at least one active record it will throw a code (77)
- Check will not occur between 6/25/14 and 9/10/14 (due to Orientation)
- Check does not occur for Print Suppressed courses

Waitlist Features

Automatic Adds

- A process will run regularly (once an hour?) that checks waitlist records.
- If a course with an active waitlist has space, it will sort the students based on specified criteria and attempt to add the top ranking student to the course
- Will continue until all spaces are full

Waitlist Features

Automatic Adds (continued)

- For F14, only First come, first served sort criteria
- Major, GPA, Level sort will be implemented for W15.
- Uses same programs as a standard add
- If student is not eligible, they will not be added
- Process will be deactivated 6/25/14 through 9/10/14 (during Orientation)

Demos

eGrades Test

GOLD Test

Future Development

Summer 2014:

- Communication tab in eGrades
- Additional data elements in extract

W15 Registration

- Criteria Based auto-add
- Handling of Cross-listings
- Other development based on F14 feedback

Questions?
